**CENTRE FOR AROMATIC PLANTS
(CAP)**

**Govt. of Uttarakhand
Industrial Estate, Selaqui
Dehradun, Uttarakhand, 248011**

CENTRE FOR AROMATIC PLANTS

An autonomous institution under the Government of Uttarakhand located in Selaqui, Dehradun, Uttarakhand, India, actively engages in Research & Development, Extension, Training, Processing, Quality Assessment, and Marketing of aromatic crops and essential oils. CAP has developed a successful model for the commercialization of aromatic crops, providing comprehensive facilities under one roof. CAP operates as a business incubator, offering support to farmers, entrepreneurs, and essential oil industries, including cultivation, processing and distillation, marketing, quality testing and certification, training, and other promotional schemes to boost the aromatic sector in Uttarakhand. The Centre for Aromatic Plants, Selaqui, has been instrumental in transforming Uttarakhand into a hub for aromatic plants and essential oils, driving both economic development and environmental conservation.

ABOUT THE PROGRAMME

The training cum workshop program on Aromatics, Perfumery, and Fragrance Creation is designed to provide participants with a comprehensive understanding of the science and artistry behind crafting fragrances. The program aims to understand the basics of perfumery through theoretical knowledge and practical training of fragrance creation and evaluation including the know-how of raw materials used in perfumery. The program also focuses on the extraction of essential oils from various aromatic plants, their blending techniques, and formulation methods used in perfumery. Participants will gain practical skills in identifying aromatic compounds, creating custom fragrances, and understanding their applications in the fragrance, cosmetics, wellness, and aromatherapy industries.

COURSE HIGHLIGHTS

- Introduction to the field of perfumery and aromatics.
- Introduction to terminologies and concepts of perfumery.
- Introduction to fragrance wheel and scent families.
- Study and odor evaluation of perfumery raw materials.
- Extraction technology demonstration of natural essential oils and perfumery raw materials.
- Formulation and creation of different fragrance accords.
